San Ramon, CA | (716)-431-9167 | [v.sridhar.sreenivas@gmail.com](mailto:v.sridhar.sreenivas@gmail.com) | [doodla.me](http://doodla.me) | [linkedin.com/in/doodla](https://linkedin.com/in/doodla)

## WORK EXPERIENCE

### InteractiveX, Full Stack Developer

Sep 2016 - Present

- Helped develop a platform for interactive learning. (<https://classavo.com>)
- Improved the interactive content editor.
- Deployed development servers and implemented methodologies to streamline development workflow.
- Worked on integrating the Discourse forums with the Classavo platform using SSO.
- Implemented a permission system for Instructors and Teaching Assistants.
- Deployed REST web-services using the Django Rest Framework.

### Lumentum, Software Developer Intern

Jun 2016 - Aug 2016

- Built an Android app which allows users to contact the nearest Lumentum Security team based on the user's location.
- Worked closely with the HR team to create an Android application which significantly improved the onboarding procedure for new employees.
- Built the back-end in NodeJS using Sails to create RESTful web services.
- Developed and deployed dashboards for managing the data for the android applications.

### Agility, Junior Software Developer

Aug 2014 - July 2015

- Developed the Agility Logistics Windows Phone App. (<https://www.microsoft.com/en-in/store/p/agility/9nblggh0k3cx>)
- Augmented the Hazard Identification Risk Assessment process by developing Take5. (<https://apps.agility.com/TargetZero/Take5/>)
- Worked on the analytics dashboard for WeSafe, an application to improve workplace safety. (<https://apps.agility.com/targetzero/wesafe/>)
- Developed the BBS application to improve workplace safety. (<https://apps.agility.com/targetzero/bbs/>)
- Also built the landing pages and dashboards for the above applications.

## EDUCATION

### University at Buffalo, State University of New York, NY

Aug 2015 - Feb 2017

Master of Science in Computer Science, GPA: 3.15

### Jawaharlal Nehru Technological University, India

Sep 2010 - May 2014

Bachelor of Technology in Computer Science, GPA: 3.5

## PROJECTS:

### Neural Network to determine handwritten digits

Jan 2016 - May 2016

Implemented multilayer perceptron using Python's numpy library with feed forward and backward propagation in neural network to learn from 50000 images of hand written numbers and distinguish test set of 10000 images.

### Multilingual Faceted Search System

Aug 2015 - Dec 2015

Built a multilingual search engine powered by Apache Solr. Performed performance analysis between Vector Space, BM25, language models with features such as content tagging, summarization and faceted search.

## PERSONAL PROJECTS:

### Cappr (New Era Hackathon, 3<sup>rd</sup> Place)

Nov 2016

An augmented reality and intelligent suggestion tool to facilitate the New Era customers' shopping experience leveraging the Microsoft Face, Computer Vision and Emotion APIs and using our own algorithms. (Python, Django, HTML, CSS, JS). Demo available at (<https://doodla.me>)

### Steam Discounts (<https://steamdiscounts.com>)

May 2012 - Oct 2014

A full-fledged store which allowed users to purchase games from Steam at a significant discount. Used an automated bot to disburse games after a successful purchase. The store was active for 2 years and made a significant income.

## TECHNICAL SKILLSET

**Languages:** Python, JavaScript, Java, Ruby, C#, VB, SQL, XML, JSON  
**Frameworks:** Django, REST, JQuery, NodeJS, SOAP, Sails, Rails, XAML, .NET  
**Tools:** Git, Solr, IIS, IntelliJ, Visual Studio, Android Studio
